

Cori Fratelli is a board-certified nurse practitioner who treats pulmonary fibrosis, sleep and other respiratory conditions.

[Nurse Practitioner](#)

[Department of Medicine](#)

[Division of Pulmonary, Critical Care & Sleep Medicine](#)

Specialties & Conditions

- General Pulmonary
- [Idiopathic Pulmonary Fibrosis \(IPF\)](#)

Special Interests

I have a unique background in both basic science and clinical research, which has informed my interest in clinical medicine. My past basic science research includes asthma, airway hyperresponsiveness, cystic fibrosis, and lung cancer. My past clinical research includes COPD and interstitial lung disease (ILD). Presently, I am interested in how research translates into personalized medicine. My clinical focus is mainly ILD, but I also see general pulmonary medicine patients, as needed.

Board Certification

2021: American Association of Nurse Practitioners (AANP) Board Certification
